ASLE 1980

Combined Subject and Author Index

Each paper published during the indexed period is assigned a sequence number, the first two digits of which indicate the year in which the paper was published. The index may be entered either through the Subject Listing or the Author Listing. The former comprises an alphabetical list of primary keywords, perhaps with associated secondary key-words, together with sequence numbers of papers of which the keywords are descriptive. The latter comprises an alphabetical listing of all authors of indexed papers, together with corresponding sequence numbers. Having determined the sequence numbers associated with a given subject or author, the papers to which these numbers refer may be found in the Chronological Listing. This Listing provides a complete reference for all papers published in *Lubrication Engineering* (L) and *ASLE Transactions* (T). The papers are listed by Author(s), Title, Publication, Volume Number (bold type), Issue Number, and Page Numbers and are in order of ascending sequence number.

An excellent source of general information in the field of lubrication is the *Standard Handbook of Lubrication Engineering*, edited by J. J. O'Connor and published by McGraw-Hill Book Company under the sponsorship of ASLE.

1980 Chronological Listing

80001 **Ludwig, L. P.,** and **Bill, R. C.,** "Gas Path Sealing in Turbine Engines," **T23,** 1, 1-22.

80002 **Begelinger, A., de Gee, A. W. J.,** and **Salomon, G.,** "Failure of Thin Film Lubrication—Function-Oriented Characterization of Additives and Steels," **T23,** 1, 23-34.

80003 **Sedy, J.,** "Improved Performance of Film-Riding Gas Seals Through Enhancement of Hydrodynamic Effects," **T23,** 1, 35-44.
